Legislative Outreach Assistant	Corvallis, OR	\$11.93/hr			OSU's Government Relations Office is seeking a student employee to assist with a number of projects during the 2015-16 academic year. Projects include: Assisting with outreach and correspondence to legislators about their constituents and news or events at OSU; Assisting with planning and execution of advocacy events at the Capitol; Maintaining legislative profiles and other databases; Researching issues associated with OSU's state and federal priorities; and Tracking federal legislation and hearings.	Successful applicants must demonstrate strong writing and web skills, including experience with Excel, and the ability to learn InDesign and Drupal. Applicants should demonstrate familiarity with Oregon's political landscape, the university's administrative structure and OSU's education, research, and outreach & extension mission and programs. To be considered, applicants should be in good academic standing.		Submit a one-page cover letter and a resume to karli.olsen@oregonstate.edu by Monday, October 30 for full consideration. Applications received after the October 30 deadline may be considered, but preference will be given to those who apply by the October 30 deadline. Candidates will be interviewed in early November and will need to complete a brief take-home assignment.		Karli Olsen		karli.olsen@oregonstate.edu	
Student Researcher	Corvallis, OR				The laboratory of Systems Bio-Medicine at the College of Pharmacy is seeking students to be members of a research team. The aim of our laboratory is to gain a better understanding of the pathogenesis of different diseases such as cancer, diabetes and immunodeficiency by investigating mechanisms of gene regulation in mammals and interactions with their microbial communities at a global level. We also try to answer the questions regarding how these mechanisms respond to pathogenic invader and consequently cause a cascade of dysfunctions in cells and the immune system. We are seeking students for two positions in our lab. The first position will include laboratory maintenance, basic laboratory tasks involving DNA and RNA analysis, and cell culture studies. Previous basic laboratory training or coursework and basic computer skills are required. The second position will include computational analysis on next generation sequencing data and network biology. This student would be expected to work 10-15 hours per week.		Preference will be given to students proficient in one of the following: R, MySQL, MatLab, Python, C++/C, Java or Perl.	To apply, email Dr. Andriy Morgun at Andriy.Morgun@oregonstate.edu. Please attach a resume including coursework, GPA, and possible hours of availability.		Andrey Morgun, MD, PhD	541-7378047	andriy.morgun@oregonstate.edu

TRiO Student Support Services at OSU	Corvallis, OR				<p>Our program is currently growing very quickly (we received a grant to serve 125 students in addition to the 175 we already serve), and we are looking to hire work-study tutors who have the ability to tutor students in a variety of subjects. Some of the most commonly requested courses for tutors are chemistry, biology, and math, but we also get requests for anatomy and physiology, physics, psychology, economics, statistics, writing, engineering, business, and other courses.</p> <p>If you know of any students who are looking for work-study positions this year and have been successful in some of the previously mentioned courses (at least a B), please encourage them to apply as soon as possible! Tutors are not expected to know the answers at all times, but rather to demonstrate how the answers can be found, to encourage students to use resources, and to help them understand the underlying concepts and processes. The position description and application procedures can be found here: jobs.oregonstate.edu/applicants/Central?quickFind=67048. Also, if students have work-study or expect to get it later this term, they can include that in their initial application email!</p>			jobs.oregonstate.edu/applicants/Central?quickFind=67048	jobs.oregonstate.edu/applicants/Central?quickFind=67048

Acoustic Spyglass Project Intern	Alaska				<p>The Acoustic Spyglass Project is looking for interns to participate in a study on the impacts of anthropogenic sound on humpback whale and harbor seal communication. Fisheries and Wildlife PhD student Michelle Fournet leads the project from a remote island in Glacier Bay National Park; field work will take place in the summer of 2016. Interns are asked to make a three month commitment, with the season spanning June 13 – August 31st. Students who are unable to make this commitment need not apply.</p> <p>Interns are expected to participate in daily data collection, including monitoring whales and harbor seals from an elevated shore station, manning acoustic equipment from a kayak, and participating in photo identification of both seals and whales. Additionally, interns are expected to participate in daily camp chores including cooking, cleaning, etc. There are no permanent facilities on the island; interns must be comfortable living outdoors in Southeast Alaska's rainforest environment without access to electricity, cell phones, or running water.</p> <p>Interns are responsible for their own travel to and from Gustavus, Alaska (possible via Alaska Airlines or Wings of Alaska) and for basic camping gear (tent, sleeping bag, sleeping pad). All other expenses and supplies, including camp cooking supplies and kayak supplies, will be covered by the project.</p>	<p>Interest interns must be willing to commit to weekly trainings beginning in April 2016 and concluding in June 2016. Training will take place between the Oregon State University Campus and the Hatfield Marine Science Center Campus. Training will include:</p> <ul style="list-style-type: none"> - Using a theodolite to monitor humpback whales and harbor seals - Using passive acoustics (hydrophones) to sample marine mammal vocalizations - Safety training for living on a remote island - Photo identification sampling protocol - Marine mammal behavior sampling <p>Interns should be in good physical condition and be comfortable working in close quarters with others. Internships are open to anyone 18 and older who are able to attend weekly trainings.</p>	<p>Previous background with marine mammals is not a requirement. Students should have a broad interest in ecology and a desire to learn field sampling techniques. Opportunities exist for senior thesis projects, and students interested in pursuing longer term project that incorporate data collected in the field are encouraged to apply. Students that are uncomfortable in consistently cold or wet conditions need not apply. This field project requires tenacity, creativity, attention to detail and good communication.</p>	<p>To apply please send a resume and cover letter with references to Michelle Fournet at: michelle.fournet@gmail.com. Applications will be accepted until the position is filled. Preference will be given to applications received prior to January 16th.</p>		Michelle Fournet		michelle.fournet@gmail.com

Eco-Informatics Summer Institute					If you are an EECS student looking for a summer research opportunity, read on! I have a funded position for a student to join the Eco-Informatics Summer Institute this summer. This is a 10-week (June 12 - August 18) interdisciplinary research program involving undergrads in computer science, mathematics, and environmental science. Participants spend the first eight weeks up at the HJ Andrews Experimental Forest (HJA; about 2 hours away in the Cascades). The student in this position will conduct field work in mountain meadows to record interactions between plant and pollinator species. Then students come back to OSU and work together to design and implement analyses of their data. The student in this position will work with me on network analysis methods for this dataset. More information is here: eco-informatics.engr.oregonstate.edu/ The funding covers a \$5000 stipend and lodging for the summer (at HJA and the OSU dorms).	You must be returning to OSU in the fall as an undergraduate to be	Students with background in probability/statistics, AI, and machine learning will be particularly well qualified.	Rebecca A. UHC Student interest in Recreation Health Metrics project		\$12.50/hour		April	Project Introduction Public land systems in Oregon, such as state parks and forests, national forests and grasslands, and county and municipal parks, provide public access for outdoor recreation activities. As people engage in outdoor recreation activities, they accrue many types of benefits. Measuring these benefits are indicators of public support for public land system by demonstrating the real benefits flows to people, communities, and the state through healthy lifestyles, lower health care costs, and overall quality of life. This research will quantify the health benefits of outdoor recreation in Oregon using a variety of metrics, and compare and contrast outdoor recreationists vs. the general population on physical activity goal attainment. Secondary analyses may be completed contingent on the availability of data regarding outdoor recreation inventory data, county-level health expenditures data, and physical activity/health data.	Student qualifications include skills such as literature reviews, data collection, database management, and data analysis (e.g., data aggregation, regression modeling), and an interest in the project.		send your statement and resume via email	More Info: http://honors.oregonstate.edu/file/recreationhealthmetricprojectsummarypdf#overlay-context=faculty-and-staff	Randall S. Rosenberger, PhD	541-737-4425	r.rosenberger@oregonstate.edu	
Software Developer Intern	west berkeley		3-6 months, flexible start date		Chirp Microsystems is bringing ultrasound to everyday products. Founded in 2013 based on pioneering research performed at the University of California, Chirp's piezoelectric micromachined ultrasonic transducers offer long range and low power in a tiny package, enabling products that perceive the three-dimensional world we live in. Combined with Chirp's embedded software library, these sensors enable new user interfaces for wearables, IoT and smart-home, virtual reality and augmented reality (AR/VR), and many more products. Learn more at www.chirpmicro.com . Chirp is located in vibrant West Berkeley. Chirp Microsystems is looking for an intern or a coop to participate in the design and development of our software solutions. The ideal candidate will have full stack experience, including firmware development for low power embedded systems and high level application development on PC, mobile, or web based platforms. The candidate must combine technical skills with the ability to communicate ideas effectively with team members from other disciplines. Chirp Microsystems _ Test Design Engineering CO- op/Internship	west berkeley		3 - 6 months, flexible start date		Chirp Microsystems is a startup company that is changing the way users interact with their devices. We do this with our highly integrates, software-defined ultrasonic transceiver product. In a 3.5x3.5 mm footprint, we are able to deliver features that previously required metal-can transducers and a pile of discrete circuitry. Alone, our product can be used as a rangefinder, proximity sensor, or button replacement. When you have more than one, we can provide 3D object tracking, gesture recognition, data communication, and many other solutions. Learn more at www.chirpmicro.com . Chirp is located in vibrant West Berkeley. We're currently searching for a talented undergraduate co-op student to assist in test system design and development. The ideal candidate will be a SOLIDWORKS wizard with a methodical cross-disciplinary engineering team, working on everything from ultrasonic acoustic design to instruction level firmware optimization, every day will provide a new challenge. BONUS points for candidates willing to provide portfolios/samples of their work.		Pursuing a Bachelor's degree in Mechanical or Industrial Engineering <ul style="list-style-type: none"> • Strong SOLIDWORKS experience • Experience in test system development and verification • Ability to communicate ideas clearly and concisely with team members of varying backgrounds • Familiarity with Python or other scripting languages a plus 	jobs@chirpmicro	www.chirpmicro.com				
Facilities Engineering Intern	Belle Chasse, LA.			Nov. 26	We have two postings currently out for full time and internships. The positions close on Nov. 26. The opportunities are currently specific to the location here in Belle Chasse, LA. I have a particular need for electrical engineers (both fulltime and interns) but we will evaluate chemical and mechanical candidates as well. I would appreciate it if you could share the postings with the Honor's College students (links below).	For interns, they will need to be able to provide their own transportation to and from the facility. We do not provide housing but do offer a \$1000/month stipend, in addition to salary, for housing costs. The stipend can be used at the interns discretion. We have a preference for juniors on interns. 					<p>Boeing Commercial Airplanes is committed to being the leader in commercial aviation by offering airplanes and services that deliver superior design, efficiency and value to our customers and a superior flying experience to their customers. Today, there are more than 10,000 Boeing commercial jetliners in service; airplanes that fly farther on less fuel, airplanes that reduce airport noise and emissions, airplanes that provide passenger-preferred comfort while delivering superior bottom-line performance to operators.</p> <p>The Boeing Company is now hiring Entry Level positions for Electrical Engineers in Everett, Washington.</p> <p>We are looking for energetic, creative, and self-driven Electrical Engineers to work on Commercial Aircraft Electric Systems. The candidate will work in a collaborative, exciting environment supporting new products, improving existing products, and/or supporting our fleet of airplanes in service. The job offers the opportunity to be mentored by senior engineers and work with world class experts across functions (design, suppliers, manufacturing, and in-service support). You will develop or modify your hardware and software designs through the lifecycle including requirements definition, architecture definition, design development, testing, and monitoring performance in service. You will research basic technologies for potential application.</p> <p>Boeing is the world's largest aerospace company and leading manufacturer of commercial airplanes and defense, space and security systems. We are engineers and technicians. Skilled scientists and</p>	<p>The ideal candidate will have a Bachelor, Master or Doctorate of Science degree in Engineering Electronic System Design Engineering Knowledge and Comprehension . Electrical Engineering degree preferred Electrical Generation & Distribution Hardware/Software Development</p>			https://jobs.boeing.com/job/everett/electrical-engineer-entry-level/185/6626191
