

HONORS COLLEGE THESIS MENTOR GUIDELINES

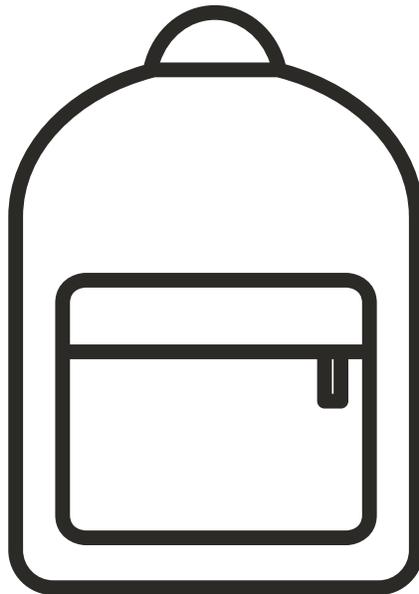

Oregon State
University

Thank you

Thank you very much for your interest in serving as a mentor to an Honors College student's thesis! The thesis mentor is a central figure in the thesis process, and the student-mentor relationship has a significant impact on students' undergraduate experiences and long-term plans. Faculty who have taken on this invaluable role in the past have appreciated the opportunity to work closely with an enthusiastic, dedicated, and talented student, and it is important to us that this be a positive experience for you, as well as for the student. The thesis is one of the main components of the Honors curriculum, and for many students, it is also one of the most rewarding and influential experiences of their undergraduate careers. The mentor-student relationship is one of the most important factors in the success of this process.

The information in this packet is intended to let you know more about the mentor's responsibilities and the thesis process.

If you have any additional questions, please let us know.

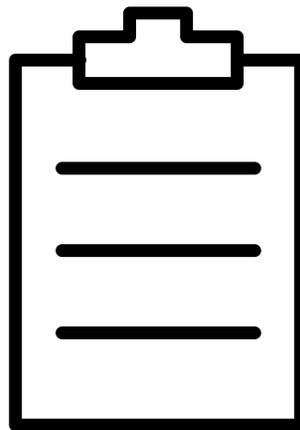

Mentor Qualifications & Recognition

All tenure-track faculty (assistant professors, associate professors, and professors) and senior instructors at OSU are eligible to serve as a **faculty mentor**. Faculty who teach in or mentor for the HC are listed on the Honors College website under [Faculty @ Staff Lists](#). This is a way of informing the campus and our students of your service and experience in the HC.

People holding other types of positions may also petition to serve as a mentor. Anyone interested in initiating a petition can fill out [this form](#). The petition process involves a rigorous review of the petitioner's experience and qualifications by Honors faculty in related disciplines as well as confirmation from the petitioner's supervisor that this responsibility would be an appropriate addition to their workload.

For projects involving surveys, interviews, or other human subject research, please be aware that the university's Institutional Review Board (IRB) has specific requirements regarding who can serve as the Principal Investigator (PI). Based on appointment type, Emeritus, Affiliate, and Courtesy Faculty may not be eligible.

Feel free to contact the HC associate dean with questions.

What is an Honors Thesis?

Like virtually every degree-granting honors program in the country, Oregon State University's Honors College requires all students to complete and defend a thesis in order to receive the Honors Baccalaureate degree. The goal of the thesis is to engage Honors students in a hands-on, participatory learning experience that allows them to see a scholarly project from inception through defense and presentation. The Honors thesis project is much more than an extended term paper: think of it as more ambitious in scope and expectations while still appropriate to an undergraduate's experience, time, and abilities. The thesis can be a traditional research project, a creative work, or a service-oriented exercise with a clear scholarly component. The projects may be within any discipline or interdisciplinary and do not need to be in or connected to the student's major field of study. Combining the HC thesis with another senior project requirement is allowed. Team projects are acceptable, but individual theses are required.

Bound copies of Honors theses are housed in the HC offices, and all theses since 2007 (and some from earlier) are also available electronically through the Valley Library ScholarsArchive (<https://ir.library.oregonstate.edu/collections/47429g339>). Students upload a digital copy and complete a release form for open access upon submission of their final thesis.

Capstone projects can inspire considerable anxiety and trepidation in students, but upon completion, many see their projects as high points of their undergraduate experience. Because the undergraduate thesis is not widely required on this campus (HC, International Degree, BioResource Research, Physics, and some Liberal Arts disciplines are exceptions), students may express concern and uncertainty at the outset about the project and their ability to complete it; a major part of the mentor role is helping students realize their own capabilities and learn to manage their concerns in a healthy, productive way.

The Thesis Process: Thesis Success in Stages (TheSIS)

Stage

I

PLAN

In their first year, students are required to take a one-credit course introducing them to the thesis process and helping them chart a tentative plan for completion.

Stage

2

EXPLORE & BUILD

In this stage, students are asked to look more carefully at what research looks like in various disciplines, explore what research is happening across campus and interview a mentor-eligible OSU faculty member.

Stage

3

COMMIT

This stage requires the student to select a mentor and write a thesis proposal outlining the thesis project.

Stage

4

COMPOSE & COMPLETE

The final stage involves completing thesis research, preparing thesis drafts, the defense, the poster, and the submission of an electronic final copy.

Thesis Proposal

The thesis mentor's first official role involves shaping and approving a student's thesis proposal. All students are required to submit an HC Thesis Proposal, Agreement, & Timeline to the HC.

Students are provided with the HC Thesis Proposal, Agreement & Timeline Template to assist with this process. Students upload this document once it is signed and approved by the mentor.

It is helpful to the student if you, as mentor, **establish your expectations** for regular meetings, progress reports, delivery dates and writing schedules. It is a "local option" whether the other two committee members are involved at this stage. **As you might expect, keeping a long-term time frame in mind is a new experience for many students, any assistance you can provide in terms of keeping them on pace will be helpful.** Although it is rare, occasionally students put the work off until too late, only to discover their calculations on timing/are seriously in error. Obviously this creates stress. Although HC students have a long "focal length" they are also likely inexperienced with producing a scholarly product that requires a sustained effort. Regular thesis meetings and progress schedules are recommended.

This approved thesis proposal becomes part of the student's file. The specificity should be appropriate for an undergraduate honors thesis project but is not fixed in stone. Deviation from the proposal is allowed; however, keep the following in mind:

- >> Minor changes should be approved by the mentor and do not require revision of the documentation on file with the HC.
- >> Major changes, such as choosing a different topic or mentor, require the student to submit a new Thesis Proposal, Agreement & Timeline to the HC.

Students may not be familiar with the norms of "thesis statements" so your direction and mentoring will be greatly appreciated. The proposal should be no longer than two pages, and be accompanied by an expectation agreement and timeline to ensure that no unexpected delays derail the process.

Thesis Committee

A three-person committee is required (larger committees are optional); it consists of the thesis mentor and two others. The HC has what we refer to as the “2/3 rule”. The thesis mentor and one other committee member must be tenure-track faculty (senior instructor or one of the professorial lines that earn tenure); the third member may be anyone the thesis mentor considers an expert (e.g. post doc; research associate, community based experts such as a physician or practitioner of a profession). **The thesis mentor has approval responsibility.** The HC will not be involved in deciding whether the third committee member meets any set of criteria.

Should the third person be a faculty member at another institution or otherwise be located away from campus, they must still participate in the thesis defense in person or via video/telephone conference connections--whatever mechanism works and does not impose undue expense on the student. The HC has no funds to help facilitate full committee participation.

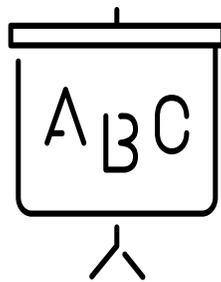

Thesis Defense & Poster

Once students have worked with their mentor and committee members to find a two-hour block of time for the defense, they must **notify the HC of their scheduled thesis defense at bit.ly/S4Defense**. This will prompt the HC to send the appropriate paperwork. Shortly before the defense date the HC Advising Office Coordinator will send the student the HC Thesis Submission Approval Form through DocuSign. Once the student has signed it (online), the form will go to the student's committee and the HC Dean for signature. All signatures must be completed through DocuSign by 5PM on Friday of Week 10 of the term the student is graduating. Students should send the email addresses of any non-OSU affiliated committee members the HC Advising Office Coordinator prior to the defense to avoid delays.

The thesis defense is comparable in form and process to a Masters student defense but the substance is clearly at an undergraduate level. The presentation portion is open to any interested parties. The examination portion should be in "executive session," with only the committee and the student present; the student is excused during committee deliberations. We advise students that the presentation and examination should take approximately one hour.

The thesis defense should be scheduled so as to permit time to make corrections, process the final document and **submit to the Scholars Archive by 5pm on Friday of week 10** of the term they expect to graduate or complete their OSU requirements. Because of interlocking schedules with the Graduation Audits clerk in the Registrar's office, **this is a fixed deadline and must be adhered to**. Students are apprised of that fact in various communications during the final stage of their thesis. Earlier submissions are acceptable, of course.

The HC Thesis Poster Fair is held in late May each year and is open to the public. All students completing their thesis are expected to participate and present their work in the form of a poster presentation. Often the mentor or the committee attends to provide moral support.

Thesis Submission

Once corrections mandated by the committee at the defense are **made**, the student submits the electronic document (PDF) to the ScholarsArchive and confirms the thesis submission form is complete through DocuSign by the deadline. By signing this form, the members of the committee are noting their acceptance of the student's work.

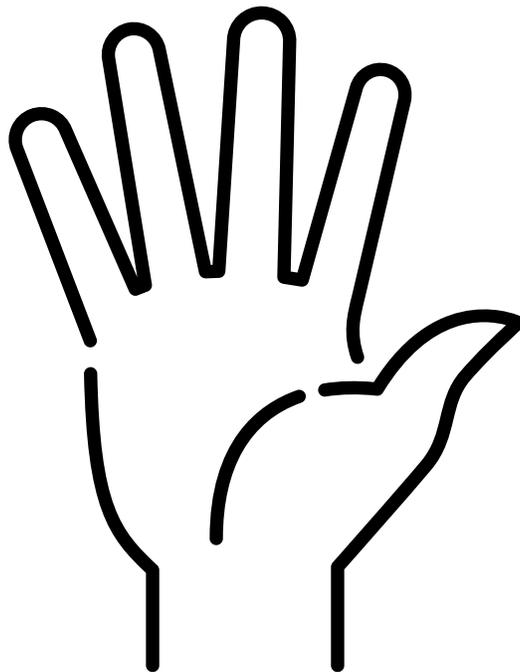

The nature of the project, standard style guidelines of the discipline, and principles of consistency determine length and format. However, there are specific requirements for formatting the pre-text pages, including the cover page, flyleaves, abstract, copyright page, title page and approval page.

Tips & Resources

Please help your student realize that the deadline for final submission to the HC of no later than Friday of week 10 has no flexibility.

Research compliance requirements are changing rapidly and all Honors research must comply with mandates. The Research Office will provide particulars (contact irb@oregonstate.edu) and web-based courses are available in several areas. The OSU policy is that student research falls under the same guidelines as the rest of the university.

Thank you again for your interest in serving as a mentor to an Honors College student's thesis!
