Second course in a two-course sequence. Topics include evaluating entrepreneurial capabilities, creativity and innovation, opportunity recognition, impression management, and responsible business practices. Continues a conversation on self-management, offering opportunities for active reflection on critical skill sets necessary for success in today's global market. *The section of BA 161H students take in Winter determines which section of BA 162H they will need in the Spring - instructors will help students match their winter and spring sections of the courses during class in Winter term.* This course is shared with a section for COB Dean's Academy students. *Honors students should register for section 019 and choose either section 010, 012, 014, or 016.* 2 out of the 3 OSU credits earned will count toward Honors College requirements. No-show-drop: students who do not attend the class by the second class meeting will be removed from the course. PREREQS: BA 161/161H. RESTRICTIONS: For first-year, pre-business students only. Satisfies: HC Elective

**BA 260H**  
**Introduction to Entrepreneurship**

**Business Process Management**  
4 HC Credit(s)

CRN: 59025  
Section 001  
LEC  
TR 1400 - 1550  
Instructor(s): Venkataramani Raja

Integrates core concepts from Business Information Systems (BIS) with those of Operations Management and introduces a process-oriented view of the flows of materials, information and services through and across organizations. The course helps students identify information-bearing events, assess and improve process efficiency, learn to model and analyze business processes, and understand the interactions between human behavior and process design. This course is shared with a section for COB Dean's Academy students. *Honors students should register for section 001.* No-show-drop: students who do not attend the class by the second class meeting will be removed from the course. PREREQS: BA 275/275H. RESTRICTIONS: Business majors/minors only. Minimum of sophomore standing required. Satisfies: HC Elective
BA 354H  **Managing Ethics and Corporate Social Responsibility**  4 HC Credit(s)
CRN: 57502  Section 001  LEC  MW 1600 - 1750
Instructor(s): Betsy Rock
Introduces contemporary issues that business professionals face making ethical and socially responsible decisions in an increasingly fast-paced, transparent, and global environment. This is a Writing Intensive Course. This course is shared with a section for COB Dean's Academy students. **Honors students should register for section 001.** No-show-drop: students who do not attend the class by the second class meeting will be removed from the course. **PREREQS:** (COMM 111/111H or COMM 114/114H) and (WR 222 or WR 323 or WR 327/327H or HC 199). **RESTRICTIONS:** Business majors/minors only. Senior standing required. **Satisfies:** HC Elective

BA 466H  **Integrative Strategic Experience**  4 HC Credit(s)
CRN: 59028  Section 001  LEC  TR 1600 - 1750
Instructor(s): Jeffrey Barden
Provides students with an overview of the basic concepts in strategic management. Students learn frameworks and models to understand and analyze a firm's external environment and internal resources in an effort to create sustainable competitive advantages. Analysis and critique of conventional conceptions of business ethics. Evaluation of ethical issues involving businesses at firm, national, and international levels. This course is shared with a section for COB Dean's Academy students. **Honors students should register for section 001.** No-show-drop: students who do not attend the class by the second class meeting will be removed from the course. **PREREQS:** (BA 240/240H or FIN 340/340H or BA 360/360H) and BA 352/352H and BA 357/357H and (BA 223/223H or BA 390/390H). **RESTRICTIONS:** Business majors/minors only. Senior standing required. **Satisfies:** HC Elective

Instructor(s): Liney Arnadottir

A unified treatment using control volume and differential analysis of binary mass transfer, prediction of mass transport properties, and introduction to mass transfer operations. 1 out of the 3 OSU credits earned counts toward Honors College Requirements. PREREQS: CHE 331/331H or CHE 332/332H. RESTRICTIONS: Must be enrolled in pro-school in the College of Engineering. Satisfies: HC Elective
CS 391H  Social and Ethical Issues in Computer Science  
CRN: 59218  Section 001  LEC  TTh 1600 - 1720  
Instructor(s): Carlos Jensen  
In-depth exploration of the social, psychological, political, and ethical issues surrounding the computer industry and the evolving information society. RESTRICTIONS: Minimum of junior standing required. Satisfies: HC BaccCore - Science, Technology, Society

DSGN 244H  Color Innovation  
CRN: 59031  Section 001  LEC  TTh 1000 - 1150  
Instructor(s): Guarang Desai  
The aesthetics, meaning, and perception of color provide the foundational knowledge in this course. This course is shared with a section for COB Dean's Academy students. Honors students should register for section 001. No-show-drop: students who do not attend the class by the second class meeting will be removed from the course. RESTRICTIONS: For Pre-Merchandising Management, Pre-Interiors, and Pre-Design & Innovation Management students only. Minimum of sophomore standing required. Satisfies: HC Elective

ED 407H  Sundown Towns in Oregon  
CRN: 60066  Section 001  SEM  W 1600 – 1750  
Field trip to Philomath outside of class hours (date TBD). Alternative assignment will be available for students unable to attend the field trip. 
Instructor(s): Jean Moule  
This course will provide an opportunity for participants to explore Oregon's racist past through the exploration of Sundown Towns – municipalities or neighborhoods that practiced racial segregation. Such an exploration will help students understand the underpinnings of our United States societal racism and of racial perspectives in Oregon. Students will participate in a directed research project that results in newly disseminated knowledge, and will choose whether the research is conducted with interviews, onsite search for records, or primary research in available documents. There will be a field trip to the Benton County Historical Society in Philomath. The goal is to facilitate authentic and relevant primary research and presentation. Professor Moule will work with students enrolled in the course to determine the best option for the date and time of the field trip to the Benton County Historical Society. An alternative assignment will be available for students unable to attend the field trip. Course Fee: $4. Satisfies: HC Colloquia

ENG 275H  The Bible as Literature  
CRN: 57514  Section 001  LEC  MWF 1100 - 1150  
Instructor(s): Chris Anderson  
In this class we'll try to set aside everything else and look closely at the language and style of the four canonical gospels, Matthew, Mark, Luke, and John, as if we are reading any other story, the work of any other creative writer: the narrative arcs, the development of character, what the stories say and what they don't. I will ask you to do two informal in-class "Quick Writes," leading to a midterm and a final essay. There will also be frequent in-class freewriting. Our emphasis will be on ways of reading--on kinds of truth and methods of interpretation. Satisfies: HC BaccCore - Literature and the Arts OR Western Culture
ENGR 299H  Design Thinking in Teams  2 HC Credit(s)
CRN: 59033  Section 001  SEM  F 1000 - 1150
Instructor(s): Belinda Batten
The objective of this course is to introduce the formal design process and to explore how team composition and
dynamics affect the end product. Customer requirements and designing for diverse user populations will be explored.
The concepts will be presented through lecture but will be developed through class discussion. The culminating activity
will be a team design competition. Each student will be expected to keep a journal and reflect on topics discussed in
class. In addition to the student's reflections, there will also be prompts provided in class to which each student will be
expected to respond in their journal. Satisfies: HC Colloquia

ENGR 299H  Experiencing Engineering Research  2 HC Credit(s)
CRN: 60072  Section 002  SEM  W 1400 - 1550
Instructor(s): Irem Tumer
This seminar is an opportunity to form relationships with research faculty and to develop research ideas for your
Honors College thesis. College of Engineering researchers will present their research and encourage discussion with
students. The primary learning outcomes of this course relate to the demonstration of knowledge about engineering
research. Specifically, you will be able to identify current issues relevant to engineering research topics, describe a
variety of research methodologies in engineering that are appropriate to a particular topic, and be able to design a
research study in engineering. Graded: P/N. Satisfies: HC Colloquia

ES 241H  Introduction to Native American Studies  4 HC Credit(s)
CRN: 60371  Section 001  LEC  TTh 1800 - 1950
Instructor(s): David Lewis
A survey of Native American cultures and history, both prior to and following contact with Europeans. Introduces the
key contemporary issues and questions in the field of Native American studies. Satisfies: HC BaccCore - Cultural
Diversity

GEOG 340H  Introduction to Water Science & Policy  3 HC Credit(s)
CRN: 56579  Section 001  LEC  TTh 1400 - 1520
Instructor(s): Aaron Wolf & Michael Campana
This course provides students with an introduction to hydrology—the science dealing with the Earth's freshwaters—and
the policies that affect use, distribution, quality, and management of those waters. About one third of the course is
devoted to science, one third to policy, and one third to student exercises and presentations, including mock
negotiations on the future of the Columbia Basin. Satisfies: HC BaccCore - Science/Technology/Society

Becoming a critical reader and thinker promotes clear writing and verbal communication. You will hone your skills in a discussion/debate format, along with frequent in-class writing assignments and presentations. You will also further develop your abilities to be a critical reader. We will be examining texts from many disciplines and on a variety of topics; you will also bring in examples for discussion. The research paper, which includes both formal documents and informal writing, will focus on an ethical/controversial issue or current research within your discipline; this will include field and library research. **PREREQS: **WR 121/121H. **HC 199 is not restricted by last name. Satisfies: HC BaccCore - Writing II**

Instructor(s): Michael Burgett

Farside Entomology is designed to introduce students to the humanistic side of entomology by utilizing the entomological humor of Gary Larson, et alia as paradigms of human-insect interactions. Interactions between humans and insects are numerous, of variable time scales and of varying implications (for both the human and the insect), ranging from the mildly humorous to the deadly serious. The "cartoon" format provides an anthropomorphic view of insects. This can be an incredibly rich venue as an introduction to the more serious aspects of insects and their relevance to human activities. A formal classroom meeting will be held once a week for 1.5 hours. At the first meeting the class will be divided into teams of 2 students per team. On an every other week basis each team will be required to present their entomological and humanistic interpretation of an entomologically based cartoon. Appropriate reference materials will be attached to each assignment. Every week thereafter a 10 to 12 minute oral presentation will be made by half of the teams. This format will allow students to serve as presenters four times during the academic quarter. Weekly out-of-class preparation time is critically important to team success. **Satisfies: HC Colloquia**

**Meets weeks 1-5 only**

Instructor(s): Dave Kovac

This course series is designed to engage students in exploring the impact, perspectives, challenges, and complexities of international service work. In the fall, we focus on cultural contexts. Winter highlights group development and team building. In Spring, we examine individual, group, and community impact of service and volunteerism. The optional international service trip (10-14 days on an in-country project) applies concepts, ideas, and energies to the international community served. The international trip isn't part of this class, but is part of the program that this class supports. In the past, our projects have included work in Romania, Ethiopia, Vietnam, and Nepal. **Meets weeks 1-5 only. Satisfies: HC Colloquia**
The course requires attendance at an organizational meeting 5/8/19, a three day field trip (5/31/19 - 6/2/19), and one discussion meeting (6/5/19). At this meeting you will turn in and discuss your written assignment. Write either of two options:
1. a short (no longer than five minute) scene based on one of the plays or
2. an analysis based on at least one character from the play.

Travel Details: We will depart from OSU on Friday, May 31, 2019 at 12:30pm; After we arrive in Ashland to check into the Best Western Windsor Inn, we will go to the Oregon Shakespeare Festival to see the first play. Saturday will consist of two shows. We will leave Ashland to travel back to Corvallis on Sunday June 2, 2018 at 10:00am (following breakfast). Course fee of $278.00 includes tickets for three plays, coach travel, and two nights stay with continental breakfast at the Windsor Inn. Bring money for snacks and meals, besides breakfast (which will be provided by the continental breakfast). Since all arrangements have been prepaid, the course fee is non-refundable if the course is not dropped prior to the 1st day of the term. All students are required to travel and stay as a group. Please note that this class can only be taken twice for credit. Pre-trip meeting: W 5/8/19 at 1700-1750; 3-day field trip: Friday through Sunday 5/31/19-6/2/19; Post-trip meeting: W 6/5/19 at 1700-1750. Fee non-refundable if not dropped by the first day of the term. Course Fee: $278. Graded: P/N. Satisfies: HC Colloquia

Students will learn about the delivery of STEM content in typical outreach environments, and you'll learn by doing. Students in this class are required to participate in five K-12 Outreach events. These 10 hours of outreach participation (approximately every other week) will be part of the course time requirements. Service Learning Opportunities include Discovery Days, Earth Day, Family Science and Engineering Nights, and school campus visits. Satisfies: HC Colloquia

We all use Wikipedia—it's the 5th most visited website in the world! But, who creates and edits Wikipedia? There are almost 300 separate (language) Wikipedias, yet, the Wikimedia Foundation has noted that Wikipedia suffers from the bias of its editors, the majority of whom are, “technically inclined, English-speaking, white-collar men living in majority-Christian, developed countries in the Northern hemisphere.” In this class we will all become creators and editors in order to address gaps in knowledge in Wikipedia. We will discuss Wikipedia's place in society with a focus on knowledge creation and sharing. In class we will have discussions, activities, and work in small groups. Outside of class you work through online modules from wikiedu.org - the modules have been designed and used with thousands of students to deliver the “how to” of creating and editing in Wikipedia. Note: If you are bilingual or multilingual, there will be opportunities to translate Wikipedia articles. Graded: P/N. Satisfies: HC Colloquia
HC 407  
**Plastics for Poets**  
2 HC Credit(s)  
CRN: 53825  
Section 004  
SEM  
Th 1600 - 1750  
  
Instructor(s): Skip Rochefort  
  
In one of the most memorable scenes from the 1967 movie classic *The Graduate*, Ben (Dustin Hoffman) is given an invaluable piece of advice by Mr. McGuire, one of his father's oldest business friends:  
Mr. McG: Ben, come with me for a minute. I want to talk to you. I just want to say one word to you. Just one word. Are you listening?  
Ben: Yes, I am sir.  
Mr. McG: PLASTICS!  
Ben: Exactly how do you mean?  
Mr. McG: There's a great future in PLASTICS. Think about it. Will you think about it?  
  
And indeed they were the future and still are a major part of the present (because they don’t break down and will never go away!). This colloquium will expose students to their reliance on plastics in every aspect of their daily lives -- from soft drinks, shampoos, and baby diapers to automobiles. The material will be presented in such a way that it is accessible to students from all majors. There are no pre-requisites for the course -- other than a genuine interest in learning how and why many of the items we encounter each day are made. After some introductory overview material, the course direction will be determined in large part by the interests of the participants. This year we will also focus on how plastics pervade our environment – from streets to landfills to our oceans – and why the traditional mantra of recycling -- Reduce, Reuse, Recycle -- will never work for plastics. **Satisfies: HC Colloquia**

**Comparative Planetology**  
2 HC Credit(s)

CRN: 54318  
Section 007  
SEM  
TTh 1000 - 1050

Instructor(s): Randall Milstein

Planetology - often referred to as planetary science - is an interdisciplinary field combining planetary astronomy with geology, geophysics, geochemistry, geomorphology, atmospheric sciences, oceanography, hydrology, glaciology, and astrobiology with intent to describe and suggest physical conditions and processes on other celestial bodies including planets, dwarf planets, moons, and asteroids. This course provides students with an introduction to the fundamental scientific principles of comparative planetology with particular attention to how we know what we know about other celestial bodies and the state of current technologies used to gather Solar System data. **Graded: P/N. Satisfies: HC Colloquia**

**Science, Aesthetics, and the Invention of Altered States**  
2 HC Credit(s)

CRN: 54319  
Section 008  
SEM  
T 1200 - 1350

Instructor(s): Robin Pappas

The nineteenth through early twentieth centuries saw a transformation in how Western cultures understand human consciousness. This shift was informed in part by “science” – technologies and methods for describing and explaining behavior and experience that were becoming disciplines: neurology, physiology, pharmacy, psychology, and psychiatry—and by “aesthetics”—the artistic, literary, and philosophical texts and perspectives (themselves using technologies and methods) emphasizing the subjective and social relevance of experience. In the interest of documenting “the whole man,” these discourses explored experiences reflecting the typically intractable aspects of human consciousness, what Aldous Huxley (author of *Brave New World* and *The Doors of Perception*) termed “the mind’s antipodes.” In short, they investigated altered states of consciousness, particularly those induced by substances. The prominent genre for articulating this transformation was the drug confession. Though first adopted by aesthetic authors, the confession model provided a rhetorical architecture for scientific writers, as well. By looking at how authors describe the phenomena they experience as a result of using substances, particularly psychedelics, we will find new ways to ask questions about topics as diverse as poetic expression, medical ethics, human consciousness, and legal history. Most important to our investigation will be the challenge of understanding how the images used to represent substance use within specific socio-historical moments inform our understandings about and judgments of those behaviors. **Satisfies: HC Colloquia**

HC 407  
**Lives and Stories: Explorations in Biography and Autobiography**  
2 HC Credit(s)

CRN: 57518  
Section 009  
SEM  
Th 1000 - 1150

Instructor(s): Thomas Bahde

This course examines the ways in which life writing, storytelling, and history are intertwined in the genres of biography and autobiography. At its core, the course asks whether authentic (auto)biography is possible and to what ends. To write about a life is to fix in time and space something that does not stand still – a difficult task, and yet one that seems necessary to understanding the human condition. We will consider themes that are essential to life writing, but also that move beyond that specific project: self-discovery/-knowledge/-awareness; empathy for both historical and contemporary individuals; and the extent to which we all make and remake personal narratives as we address ourselves to the ever-changing world and people around us. In addition to weekly readings and class discussions, students will produce a piece of life writing during the course – biographical, autobiographical, or some combination – as a way to explore one or more of these themes in a significant way. **Graded: P/N. Satisfies: HC Colloquia**
HC 407  
**Technology and the Good Life**

**CRN:** 55704  
**Section:** 010  
**SEM:** W 1400 - 1550

Instructor(s): Kenneth Funk

We all seek the Good Life, a life wherein our material needs are met and certain higher goods are realized, and, for many of us, technology has become a chief, if not the pre-eminent, means to it. But technology can also be an impediment to the Good Life and the roots of this ambivalent nature of technology may lie in our own fallibilities, mental and moral. In this colloquium, we will discuss the Good Life, why technology can be both means and impediment to it, and how to make technology more of the former and less of the latter. **Graded: P/N. Satisfies: HC Colloquia**

**Ecology, Sustainability, and Human Health**

**CRN:** 56580  
**Section:** 011  
**SEM:** Th 1000 – 1150

Instructor(s): Viktor Bovbjerg

The confluence of ecology and human health is key to sustainability—to the continued presence of people on the earth. We will explore population, community, and individual health through the lens of ecology, how humans interact with other organisms and their environments. The course will be a mix of field work and discussion. Field work will consist of visiting natural and human-altered/built environments, to assess their potential relationships to human health. These trips will form the basis for discussion, to illustrate the deeper relationships of humans and human health to the living and physical environment. This class meets weeks 2, 4, 6, 8, and 10 only. **Course Fee:** $8. **Graded: P/N. Satisfies: HC Colloquia**

HC 407  
**From Zombies to Preppers: America's Apocalypse Addiction**

**CRN:** 55705  
**Section:** 012  
**SEM:** Th 1200 - 1350

Instructor(s): Robert Drummond

To judge from the glut of movies and books set in a post-apocalyptic world, America is addicted to the fantasy of doomsday. Zombies, viral pandemics, nuclear holocausts, global warming-caused disasters, alien invasions -- the list goes on. In this course, we'll explore America's appetite for an apocalypse, considering where this yearning comes from and seeking to understand why it's eternally compelling. We'll also look at how it's spilling over to reality in the form of "prepping." If you can think of a catastrophic global event capable of wiping out most of the world's human population, then there are people preparing (prepping) to survive it. When these preppers talk and plan for the loss of governmental and societal structure, are they fretting or fantasizing? In other words, are they harmless people with a hobby, or is there something more disturbing behind their growing numbers? And are they all that different from those of us who simply enjoy watching Brad Pitt fight teeming swarms of zombies on the big screen? This course will involve a variety of readings and films as we seek to get to the bottom of this issue. **Graded: P/N. Satisfies: HC Colloquia**
C. S. Lewis (1898-1963), Oxford don, novelist, and literary critic, was one of the most gifted and popular theological writers of his generation. Lewis dealt in his philosophical and imaginative works with some of the most basic and perennial moral and religious questions. The format will consist of discussion based on selected readings from four well-known books of C. S. Lewis. I will encourage the expression of a variety of points of view and help students both to analyze Lewis's ideas and to express their own opinions in a rational and informed manner. Lewis is provocative and his writings lend themselves to discussion and debate. A writing component is included in the form of a short paper of eight to ten pages based on the assigned reading for the course. The topic: ‘How does C. S. Lewis develop and illustrate in his fictional works the themes that he discusses in his philosophical works?’ It will be graded on both content and style. Verbal communication skills will be cultivated by the discussion format. **Graded: P/N. Satisfies: HC Colloquia**

The point of this seminar: “Leading with optimism.” All of you are and will continue to be a leader in some aspect of your lives. My definition of leadership is “the creation of a solution, a solution to something.” The solution could be as simple as directing a child on how to cross the street or facilitating a group in determining how to address hunger in third world countries. Solutions have a greater degree of success when created from an optimistic perspective. Positive Psychology and the PERMA Theory provide a working framework for creating solutions that are more likely to succeed over a period of time and be effective. **Graded: P/N. Satisfies: HC Colloquia**

Life - What is it? Where does it come from? How do we classify it? You will gain an enhanced appreciation for the astonishing complexity of Earth's biosphere at its many spatial and temporal scales. We will cover aspects of biology, ecology, parasitology, geology, astronomy and how these filter into our everyday human lives through the news media, science fiction and other genres. This colloquium series should satisfy anyone who is curious about the living world in and around them, and wants to experience a synthesis of academic and artistic learning. Students with non-science/biology/art backgrounds are most welcome! We will meet face-to-face for a single, one hour fifty minute session each week. A typical class will involve a seminar on the weekly topic, student presentations, group discussions, and a hands-on art-centric activity. Assessment will be through online quizzes and creative assignments that include: short oral presentations, basic art creations using different media, and note-taking in your class journal. There will be no mid- or final- exams, but participants will have to submit their class journal and art pieces for grading. **Graded: P/N. Satisfies: HC Colloquia**
HC 407  
**Sex and Gender in the Archives**  
2 HC Credit(s)

CRN: 57522  
Section 017  
SEM  
W 1000 - 1150

**Field trip to Portland (date TBD). Alternative assignment for students unable to make the field trip.**

Instructor(s): Bradley Boovy

In this colloquium you will conduct original archival research on topics related to gender and sexuality, aspects of people's life experience that are often hidden from plain view in historical records. You will learn how to identify, obtain, and review primary sources, and formulate an original research question based on your research. You will also learn how to apply these skills in your field of study. We will make several visits to OSU Special Collections and Archives Research Center (SCARC) for hands-on experience working in archives, and will also go on an excursion to the Oregon Historical Society in Portland. (Students who are not able to make the excursion will be given an alternative assignment.) Finally, we will work together to create and curate an exhibit in the Valley Library based on your archival research. **Course Fee:** $9. **Graded:** P/N. **Satisfies:** HC Colloquia

HC 407  
**Toy-Based Technology for Children with Disabilities**  
2 HC Credit(s)

CRN: 56581  
Section 018  
SEM  
T 1400 - 1550

Instructor(s): Sam Logan

This is a ‘hands-on’ and ‘brains-on’ course where students will gain skills and knowledge through real-world experience and the reading and discussion of current scientific research related to core course topics. This experience will be driven through engagement with the Go Baby Go (GBG) program. GBG is a community-based outreach program that works with families, clinicians and industry to provide modified ride-on toy cars to children with disabilities to use for fun, function, and exploration. [http://health.oregonstate.edu/gobabygo](http://health.oregonstate.edu/gobabygo). Students will gain the necessary technical skills such as cutting PVC pipe and basic wiring. Students will work directly with families to customize ride-on car modifications to meet the individual needs of children with disabilities. The technical skills and scientific research will be open and accessible to all students, regardless of previous background or experience. **Satisfies:** HC Colloquia

HC 407  
**Information Privilege, Open Access, and Social Justice**  
2 HC Credit(s)

CRN: 59037  
Section 019  
SEM  
MW 1300 - 1350

Instructor(s): Stefanie Buck

“Information privilege” is the gap between those who can and cannot access information, and therefore contribute to the scholarly conversation. Students are unlikely to encounter discussions of “information privilege” in other classes but they are all impacted by it and it is discipline agnostic. Starting with the rising costs of textbooks and other course materials, we will explore what creates the financial, legal, and social barriers that prevent access to essential educational and research materials. We will discuss the history and philosophy behind the Open Access (OA) movement, the belief that educational and scholarly materials should be freely available. We will locate and review Open Access and Open Education Resources and investigate the different issues surrounding the use of open access materials, including copyright and Creative Commons licensing. Course projects and activities will include conducting faculty and student interviews, creating OA marketing tools, and reflections on reading and discussions and, for the final project, creating a guide to help faculty select open access resources for their courses. **Graded:** P/N. **Satisfies:** HC Colloquia
Throughout this course, we will examine *The Log from the Sea of Cortez*, the book chronicling the voyage of John Steinbeck and Ed Ricketts to collect marine fauna in the Gulf of California. The course will employ interdisciplinary lectures, discussions, group and individual research, guest lectures and film to explore the work’s rich context in terms of coastal marine science and investigation, politics (U.S. and natural resource), history and natural history, friendship, philosophy, ethics, and navigation. The class will culminate in a discussion of the literal and figurative meanings of terms such as expedition, voyage, and discovery, their relevance to contemporary society, and how we may interpret these terms within our lives both as individuals and communities confronted with a changing environment. **Satisfies: HC Colloquia**

**Imaging the American West**

The American West is formative in American culture. The Western landscape has been imaged as iconic: a stage on which cultural constructions of individualism, gender, empire, otherness, and nature are graphically enacted. Western peoples, similarly, have often been presented as archetypes, representative of American myths, fears, and ideals. In this course, we will explore images of the West—paintings, photographs, and Western films—and their deep implications. We will also create and present original images in order to experience the process and power of visual depiction. **Graded: P/N. Satisfies: HC Colloquia**

**Online Newsroom**

Students in the Online Newsroom colloquium will learn to write, edit, publish and distribute feature stories at The Corvallis Review (www.corvallisreview.com), which has attracted over 140,000 page views. They will learn interview and research techniques, become proficient at online publishing on a common platform, learn to edit photos and videos, and will learn to write in clear, efficient, journalistic style. They will also learn basic Search Engine Optimization techniques, including those related to keywords and meta data, and learn to leverage social media in order to build readership. They will also learn how these skills transfer to business communication and marketing. **Graded: P/N. Satisfies: HC Colloquia**

**Soundscaping**

Sharpen your musical listening skills, deepen your understanding of music of all sorts, and have fun composing music and performing works your classmates compose. No musical prior musical training required. Devise graphical notations to create "maps" by way of analyzing and presenting an assigned piece of music and then a piece -- from any genre -- of your own choosing. Then use those same graphic skills to compose two pieces of your own. (See some examples posted at corvallisreview.blogspot.com.) Your classmates will form your orchestra. They will play on the instructor’s collection of junk instruments and noisemakers and on any sound-creating devices the composer cares to bring in. **Graded: P/N. Satisfies: HC Colloquia**
**HC 407**  
*Climate Change and Its Challenges: Responding with Resilience in Community*  
2 HC Credit(s)

CRN: 59042  
Section 024  
SEM  
Th 800 - 950

Field trip during class hours. Alternative assignment for students unable to attend the field trip.

Instructor(s): Ken Winograd

How much do you think about climate change? Are you curious and/or concerned? If you would like to examine the perils and opportunities of climate change for you personally, this class offers an opportunity to reflect and learn about what scientists and theologians say is the greatest challenge for humankind, ever. Your personal response to climate change will be the point of departure in learning the ways that people, groups and societies are coping, adapting and even thriving with the challenges ahead. A portion of the class consists of a workshop developed by author and activist Joanna Macy, an interactive group process that 'equips us to with tools to face the mess we’re in and play our role in the collective transition...to a life-sustaining society.' You will be challenged to rethink your role as citizen 'in community' in a world reshaped by the changing climate. Other related topics we will address include environmental justice, peace literacy, the nature-human relationship, and social activism. Learning activities will include readings, discussion, a field trip, readings, and group reflections. **Course Fee: $4. Graded: P/N. Satisfies: HC Colloquia**

**HC 407**  
*Science, Ethics and Star Trek*  
1 HC Credit(s)

CRN: 59043  
Section 025  
SEM  
T 1000 - 1050

Instructor(s): Diana Rohlman

“What you're doing isn't self-defense. It's the exploitation of another species for your own benefit. My people decided a long time ago that that was unacceptable, even in the name of scientific progress.” Captain Kathryn Janeway.

To this day, while we have the ability to clone animals (and therefore humans), the ethical and moral ramifications have tempered many scientific advances. The fictional universe of Star Trek often explores the nexus of advanced technologies and the resultant ethical considerations. This class will use episodes from the Star Trek universe, paired with real-life case studies to delve into the seen and unforeseen consequences of advanced technologies. Examples include experimental surgical techniques, genetic engineering, cloning, artificial intelligence and environmental regulations. **Satisfies: HC Colloquia**

**HC 407**  
*Advancing Our Knowledge of Earth and Beyond: Satellite Missions*  
2 HC Credit(s)

CRN: 59044  
Section 026  
SEM  
Th 1200 - 1350

Instructor(s): Nancy Squires

This course will be an exploration of some of the most exciting space missions, both past and present. Satellites are used to study space and earth science, provide important communication links around the world and give us a glimpse of distance planets, moons and asteroids in our solar system and beyond. The course will also include an overview of satellite orbits, fundamentals of the rocket science used to launch satellites to the correct orbit, an overview of satellite power systems and how they communicate data back to earth. Current industry and research practices of satellite mission design will be explored. An optional viewing of a prominent satellite's fly-by is planned. **Satisfies: HC Colloquia**
The Evolving Role of Alcoholic Drinks in Society

Instructor(s): Paul Hughes

Across most of the world, alcoholic drinks have had a substantial, sustained impact on humankind from economic, social and technical perspectives. This belies the fact that today the alcoholic drinks sector is essentially part of the leisure sector. In this colloquium, we will explore the development of the alcoholic drinks sector, focusing on beers, wines and spirits, and to explore their changing role in society, from a potable source of water to social lubricant. We will then debate the definitions of “beer”, “wines” and “spirits” as innovation challenges the traditional definitions and then consider innovation in the context of business growth and the role of the rapidly-growing craft sectors as a foil to megamergers and global brands. By the end of this colloquium you will be in a good position to understand, for better or worse, how the alcohol industry impacts everyday lives across the globe. This class is a weekend symposium that meets only on Saturday and Sunday 3/30/19 & 3/31/19. There will be a field trip to local beer and spirit producers. Students do not need to be 21 in order to take this class. Course Fee: $4. Graded: P/N. Satisfies: HC Colloquia

Competing for the Center of the Universe: The Trial of Galileo Re-Enacted

Instructor(s): Peter Kelly

It is the year 1633, Galileo Galilei stands trial before the Roman Inquisition, charged with committing heresy for advocating the Copernican belief that the sun rather than the earth lies at the center of the universe. It is up to you to decide the outcome. Should Galileo’s books be banned? Should he be placed under arrest, or even worse? This course uses curriculum developed by Reacting to the Past (https://reacting.barnard.edu/), which consists of elaborate games, set in the past, in which students are assigned roles informed by classic texts in the history of ideas. In the first part of this course you will be introduced to the competing world views in the early modern period, before examining the political and religious backdrop to the trial of Galileo. You will then re-enact the trial using the Reacting to the Past game ‘The Trial of Galileo’, with the ability to revise its outcome. This role playing game seeks to draw students into the past, promote engagement with big ideas, and improve intellectual, academic and rhetorical skills. You will be faced with negotiating a politically and religiously sensitive environment, not unlike the one we live in today. Graded: P/N. Satisfies: HC Colloquia

Gender, Power and the Politics of Truth

Instructor(s): Brian Fuller

How are our beliefs related to our identities and backgrounds? How can we make a difference in a society in which the powerful seem to set the boundaries of knowledge and truth? And how can we ethically practice social criticism when it seems that everything is relative, that everyone is entitled to their own opinion? In this colloquium we’ll explore these questions and more by engaging with some of the most important contemporary authors from the fields of philosophy, gender studies, sociology and political science. We’ll build up a foundation of key concepts which will help us understand how dynamics of power, knowledge, identity and truth operate in our social worlds, and thereby provide us resources for building towards positive social change. For anyone who’s interested in how to connect their interest in social justice with academic learning and discussion, as well as those who would like to develop their critical reading, interpretation and communication skills in a collaborative and supportive environment. Graded: P/N. Satisfies: HC Colloquia
How does visual art differ from literature? What makes a myth and can we trace its origin? In this course you will be introduced to one of the most influential works from ancient literature, the Metamorphoses by the Roman poet Ovid and its reception in visual art. The world of the Metamorphoses is one of flux and transgression, where humans continually transform into animals, plants, and various features of the natural landscape. We will look at how the Metamorphoses blurs the distinction between literary and visual art and the challenge this presents to later artists attempting to recreate these myths using visual media. You will devise a specialized project focusing on the creation and recreation of a myth from the Metamorphoses in any artist or artists of your choosing, while exploring innovative ways of visually conveying and displaying your research. No previous knowledge of ancient literature or art history is required. Satisfies: HC Colloquia

In this colloquium we will read, discuss, and critique physicist David Deutsch's The Beginning of Infinity: Explanations that Transform the World. Deutsch posits that all progress has resulted from a single human activity: the search for good explanations. Deutsch's deep and wide-ranging book delves into the philosophy of science, quantum computing, evolution, history, the multiverse hypothesis, sustainability, art, and the origin of creativity. The only required book is Deutsch's. Graded: P/N. Satisfies: HC Colloquia

Business as usual isn't working -- consumerism, incessant distractions, and the never-ending push for economic growth haven't made us happier. Neither have our compulsion for personal advancement nor our tepid concern for the common good. The individual, social, and environmental costs of this cultural crisis are becoming intolerable. Our seminar will be structured around readings from Enough is Enough: Building a Sustainable Economy in a World of Finite Resources. A 2-page "critical reaction paper" will prepare you for class discussions and provide me with a way to offer suggestions for improving your writing. In essence, we will be confronting head-on the unsustainable way of life of the modern era and examining some well-conceived alternatives. Graded: P/N. Satisfies: HC Colloquia

The universe is far more than what our eyes can see. Students will start expanding their view by learning the basics of astrophotography. Using their own cameras of any type, students will go outside and image the night sky. You will learn various methods of image processing that will help tease out all available information. From there, the course will look at many of the resources available that will reveal more of the spectrum of the universe, including radio telescopes, orbiting observatories, and other novel techniques. There will be opportunities to look through solar telescopes, experience a local star party with a wide range of telescopes, and connect to and image through a telescope on a remote mountain in New Mexico. By the end of the course, the full spectrum of the universe will be revealed. Graded: P/N. Satisfies: HC Colloquia
Lady Detectives

CRN: 59844
Section 401
SEM online

Instructor(s): Clare Braun

From Agatha Christie’s Miss Marple to Kristen Bell’s Veronica Mars, women have solved some of the dastardliest crimes of the detective genre both on the page and on the screen. We will look at a variety of texts and films featuring lady detectives—some very ladylike indeed, some decidedly not—to examine the cross-sections between gender and genre. How do these detectives use their performance of gender to solve mysteries? How do these stories challenge, reinforce, and/or complicate traditional notions of gender and crime? This is an Ecampus course. Tuition rates for Ecampus courses are different than on-campus courses and can be found at ecampus.oregonstate.edu/services/tuition. Graded: P/N.

Satisfies: HC Colloquia

Thesis: Stage 2 Explore & Build

CRN: 53483
Section 001
HYB
Th 1700 - 1850

Meets weeks 2, 4, 6, & 10 only

Instructor(s): Kassena Hillman & Staff TBD

HC 408: Stage 2 Explore & Build will guide you through the second stage of the Thesis Success in Stages (TheSIS) process. In this class you will explore the many resources at the HC and OSU to help you find a mentor and a project, build strategies for a successful thesis experience, learn the components of the thesis, and plan out your next steps. You will also hear from students and faculty with recent experience in the thesis process. **You do not need to have a thesis idea to be in Stage 2.** PREREQS: Completion of “Stage 1: Plan” workshop. This course is a hybrid course that consists of weekly online assignments and one hour in-person class meetings weeks 2, 4, 6, & 10. This course will be team taught with an HC Academic Advisor and HC faculty. Graded: P/N. Satisfies: HC Thesis/Research/Projects

Thesis: Stage 3 Commit

CRN: 54321
Section 002
WS
Th 1600 - 1750

Meets weeks 3 and 7 only

Instructor(s): Rebekah Lancelin & Michael Burgett

This course will guide students through Stage 3 of the Thesis Success in Stages (TheSIS) process, Commit. We will cover the process of developing a thesis topic, finding a thesis mentor, creating a thesis statement, writing a thesis proposal, and developing a research plan. The course will require participants to turn in a completed thesis proposal signed by a thesis mentor, which is the end goal of the Commit stage and a required component of the TheSIS process in the Honors College. Meets weeks 3 and 7 only. Prereqs: Prior completion of TheSIS Stages 1 & 2 as outlined at honors.oregonstate.edu/thesis. Graded: P/N. Satisfies: HC Thesis/Research/Projects

Thesis: Stage 4 Compose & Complete

CRN: 55343
Section 003
WS
F 1400 - 1550

Meets weeks 2, 4, and 6 only.

Instructor(s): Ben Mason

This course will guide students through the final stage of the Thesis Success in Stages (TheSIS) process, Compose & Complete. The goals of this stage are the completion of a thesis draft, the preparation for the thesis defense, and the design of a thesis poster. Students need to have completed a significant amount of their research and be prepared to begin writing the thesis draft. The course is largely discussion based, with time for writing workshops built in; therefore, this course is relevant for students in all disciplines. Meets weeks 2, 4, and 6 only. Prereq: Prior completion of TheSIS Stages 1, 2, & 3 as outlined at honors.oregonstate.edu/thesis. Graded: P/N. Satisfies: HC Thesis/Research/Projects
HC 409 | Conversants | 1 HC Credit(s)

CRN: 51188  Section 007  PRAC

Instructor(s): Leanna Dillon

The INTO OSU Cultural Ambassador Conversant Program provides an opportunity for honors students to earn credit while participating in a mutual cultural exchange. Participating honors students commit to meeting on average one hour per week with their international partner, keep a log of the times and places they met and the topics discussed, and complete a 2 page reflections paper due at the end of the term. Program information including the application process is available at http://oregonstate.edu/international/cultural-ambassador. Students must meet with an HC advisor to complete a Learning Agreement in order to register for this course. Applications must be submitted online no later than the end of week 1. Graded: P/N. Satisfies: HC Elective

HC 409 | Civic Engagement | 1 HC Credit(s)

CRN: 54862  Section 008  PRAC

Instructor(s): Leanna Dillon

The Center for Civic Engagement provides an opportunity for honors students to earn credit while participating in an ongoing community engagement project within the local community. Participating honors students commit to serve an average of 2-3 hours per week within their project site, keep track of their service hours, and complete a 2 page reflection paper due at the end of the term. Additional information, including placement opportunities, is available at: http://sli.oregonstate.edu/cce. Students must meet with an HC advisor to complete a Learning Agreement and a CCE staff member to discuss placement opportunities in order to register for this course. Placement must take place prior to the start of the term. Graded: P/N. Satisfies: HC Elective

HDFS 499H | Stress, Coping, and Resilience | 2 HC Credit(s)

CRN: 59223  Section 001  SEM  T 1200 - 1350

Instructor(s): Carolyn Aldwin

The purpose of this class is to examine stress and coping from cells to society. We will examine how stress affects the body, how individuals cope with stress, and how both our current context and the larger society influence these processes, through both media and other cultural institutions. We will also focus on the positive aspects of stress – that is, how people learn and grow from going through stressful periods in their lives, and what personal and sociocultural factors contribute to resilience. Satisfies: HC Colloquia

Satisfies: HC Elective

MUS 102H  History of Rock & Roll  3 HC Credit(s)
CRN: 53869  Section 001  LEC  MWF 1200 - 1250

Instructor(s): Ryan Biesack

This survey is a selected examination and study of musical and social events that have occurred in popular culture over a period of roughly the past 50 years, and what has come to be known generally as “Rock” music. The survey will begin its journey looking at the 1950s and the beginnings of Rock music and conclude with the Rock culture of today. The term “Rock” music will be used as an umbrella or generic term to cover the many variations of popular music that fall under its reach: Motown, Soul, R&B, Disco, Acid Rock, Death Metal, Thrash Metal, Punk Rock, Indy Rock, Grunge, etc. As there are numerous artists and performers who have contributed to Rock music, this survey will focus on a selected group who have significantly changed, or illustrate the change, in Rock music. This course will examine some of the pinnacle recordings, repertoire, artists, concerts, performances, and events to provide insight and meaning as to “how” and “what” this music was changing within pop culture in a historical and social context. By examining different works of Rock music, we can hope to extrapolate broader meaning and understanding of these events in an overarching sense relative to recent history. This course will also examine how Rock music has functioned as a vehicle for commentary on everything from sex to religion to politics, and how this music continues to be a relevant and ever-changing vehicle in the present day. Satisfies: HC BaccCore - Literature and the Arts

PAC 293H  Interdisciplinary Yoga: Mindfullness Skills  1 HC Credit(s)
CRN: 59950  Section 001  ACT  Th 1400 - 1550

Instructor(s): Tsipora Berman

Journey to the seen and the unseen through a multi-sensory, interdisciplinary, transformative study of mindfulness utilizing a fun, creative variety of individual and group mind/body practices applicable to everyday life and across academic disciplines. Develop your imagination, intuition, inspiration, integration, and interpretation including 15 sensory perceptions to live to your highest potential with resilience to navigate the challenges of personal and professional endeavors. You will unravel the mysteries of why the 8,000 year old science of Yoga is all encompassing, integrated with Positive Psychology, Physics, Neuroscience, Human Biology, and grounded in the eight-part awakening process. Course Fee: $49. Satisfies: HC BaccCore - Fitness
PAC 325H  Wilderness First Aid
CRN: 60073  Section 001  ACT  W 1200 - 1350

Instructor(s): Sheila Evans

Crunch! Ugh... Ouch! Do you recreate with accident-prone friends or family? Do you spend any time playing the outdoors? Knowing the fundamentals of emergency care in non-urban environments are useful skills. Backcountry emphasis with long-term care and evacuation complications makes this course unique. There will be a number of outdoor sessions so come prepared with “grubby” clothes that will get dirty or fake-bloody. The course has two components: knowledge as evidenced by performance on written exams and quizzes and practical skills as demonstrated throughout the course and on the final exam. **Hold the Date for the Wild Day: Saturday, May 18, 2019. Course Fee: $167.**

Satisfies: HC BaccCore - Fitness

PAX 415H  Peace Literacy
CRN: 59251  Section 001  SEM

Instructor(s): Sharyn Clough

This course approaches peace not only as a global outcome, but also as a set of skills to be developed. The three peace skills we focus on in this class are Cultivating Empathy to Understand Aggression, Listening to Build Respect, and Developing Inner Calm to Navigate Conflict. These peace skills fall under what the philosopher Aristotle would call the set of virtues, in particular the virtue of phronesis or practical wisdom. Of course our understanding of the requirements of phronesis has expanded since Aristotle's time. We now know that acquiring and practicing peace skills requires understanding the anatomy of trauma, war, and social injustice. On a methodological note, treating peace as a skill, as a virtue like phronesis, means that we must learn peace through practice. In this class we will study and practice. Students will design exercises to practice the skills they learn. Another way of thinking about being skilled in peace is being literate in peace, hence peace literacy. Peace Literacy was conceived by West Point graduate and Iraq war veteran Paul K. Chappell, who will be a guest lecturer in the class. This class is a weekend symposium that meets only on Friday 3/29/19, Saturday 3/30/19, and Sunday 3/31/19. **Satisfies: HC Colloquia**

PH 211H  General Physics with Calculus
CRN: 59659  Section 001  LEC  MWF 1100 - 1150

CRN: 59660  Section 010  LAB  T 1600 - 1750

Instructor(s): Albert Stetz

Did you know that with a good time machine you could be simultaneously your own father, mother, and daughter? Does that appeal to you? On the other hand, Saint Augustine claimed that time was an illusion. Past, present, and future are all present in the mind of God. Special relativity seems to bear this out. So what happened to free will? But with a simple quantum measurement you can change the past. So what comes first, the effect or its cause? We'll discuss these and related questions in this class. **Satisfies: HC Colloquia**

PHL/REL 444H  
**Biomedical Ethics**

MW 1400 - 1550

Instructor(s): Doug Clark

This course examines the US civil rights movement and its impact on the resulting public policies circa: 1945-1970. We're particularly interested in the strategies and tactics that produced the dramatic public policy victories designed to overcome inequalities in education, public facilities, voting, and housing. Just as significant are the strategies and tactics employed in the counterattack that frustrated the implementation and enforcement of civil rights principles and ended what had been optimistically seen as a Second Reconstruction. Within the context of this movement and public policy history, we are interested in where we are today? Do the current battles from the streets to the courts over racial inequality, mass incarceration, police violence, voter suppression, school failure, and economic inequality indicate a new civil rights agenda seventy-five years later? Does the current activism in the form of groups such as Black Lives Matter, Equality Federation, Lawyers for Equality, Dream Defenders, BYP100, Hands-Up United, and Million Hoodies Movement for Justice, represent a new, different civil rights moment? What do the lessons of public policy success and failure teach us about the possibilities? **Satisfies: HC BaccCore - Difference, Power, and Discrimination**

SEM  
T 1700 - 2050

Class takes weekly trips to Salem or Woodburn during class meeting hours.

Instructor(s): Michelle Inderbitzin

SOC 444H – Crime, Communities, Prisons, and Prevention – in Spring 2019 will be the first ENACT course in Oregon. In this unique course, students will learn alongside individuals incarcerated in a maximum-security prison. OSU Honors College students and prisoners will work together doing policy research around criminal justice issues; they will then advocate with community organizations, administrators, and state legislators to work towards social change. The course will meet on Wednesday nights in Salem within the Oregon State Penitentiary. It will require additional, but flexible, meetings in Salem to visit legislators in the state capitol. It will be a hands-on learning experience, and grades will be based on active participation and projects related to current policy issues. All majors and grade levels are welcome. Given that the course will take place within a maximum-security prison, students will need to meet with Professor Inderbitzin and pass a criminal background check before they are able to enroll. Questions or interest: please contact Professor Inderbitzin: mli@oregonstate.edu. For more information about ENACT, The Educational Network for Active Civic Transformation, see here: https://www.brandeis.edu/ethics/ENACT/index.html. **Course Fee: $66. Satisfies: HC Elective**
WGSS 223H  Introduction to Women, Gender, and Sexuality Studies  3 HC Credit(s)
CRN: 60070  Section 001  LEC  TTh 1200 - 1320
Instructor(s): Liddy Detar
A creative and critical introduction to feminism and social justice, this course invites you to participate in our culture's contemporary conversations about power, privilege and oppression. Readings, assignments and social media materials will engage issues of gender, race, class, age, sexual orientation, size, ability. Satisfies: HC BaccCore - Difference, Power, and Discrimination OR Social Processes and Institutions

WGSS 340H  Gender and Science  3 HC Credit(s)
CRN: 60071  Section 001  LEC  TTh 1600 - 1720
Instructor(s): Kryn Freehling-Burton
Analyzes the relationship between society and science by explaining technology and science as gendered practices and bodies of knowledge. Focuses on the ways the making of women and men affect the making of science and explores the roles of women in scientific pursuits. Satisfies: HC BaccCore - Science, Technology, Society
